

A Flower for each day

Trigueirinho

José Trigueirinho Netto,

spiritual philosopher, is the author of 81 books, published in several languages and of more than 2,400 lectures recorded live, which are available for free at Irdin Editora Association.

At each new step on our spiritual path, our understanding expands. New tests arise and new keys become necessary. In the vast work by Trigueirinho, we obtain the clarification we need. And, as happens in all authentic spiritual instruction, as we return to the same topic, we will discover hues that we had not perceived before.

The current times offer unprecedented conditions for the knowledge of higher laws and for the awakening of a great inner potential.

As a being that anticipates his epoch, Trigueirinho opens stimulant opportunities to those who aspire to a fuller life with the Kingdoms of Nature.

A flower for each day,

gifts of God for all of us!

These flowers were photographed with the aim of observing more closely these beautiful creations of God, with their diverse forms, geometric designs and shades of color, which, throughout one year, arose in the **Community-of-Light of Figueira-F2**, in the town of Carmo da Cachoeira, Minas Gerais, Brazil. As we contemplate a flower in its simplicity, we see all its perfection and we feel how the Plant Kingdom always donates the best to us, without expecting anything in return. It is as if, in the unfoldment of the flowers that the Kingdom reveres and thanks the Creator. Just as God, the flowers, with all their multiplicity, are everywhere; it suffices to perceive them. “Plants grow toward light, capture it, emit it as colors and just like light, donate of themselves” (*Trigueirinho, “Glossário Esotérico”, page 407*).
